Structures,** freeCodeCamp.org

March 2021

**Responsive Web Design,**  
freeCodeCamp.org

December 2020

**Introduction to Web Design,**  
GeekBrains

Developer with a digital marketing background and experience in building WEB-applications with React + Redux tested with Jest.

I worked in a distributed scrum team using Jira for task-management. I am fluent in HTML, CSS (SCSS), JS and TS. Also familiar with: Webpack, REST APIs, Node.js, Docker, Postman.

My previous jobs taught me to carefully consider the audience. So while creating mobile-first responsive websites I try to make the user's experience to be nice and easy.

I am interested in projects, where I can boost my skills and learn modern technologies. Ready to consider positions for beginners.

### PROFESSIONAL EXPERIENCE

March 2022 – Present

#### Frontend Developer at freelance

- Migrated a project from JS + jQuery to React;
- Implemented CSS Modules instead of Styled Components;
- Developed adaptive and responsive client interfaces.

October 2021 – Present

#### Junior Frontend Developer at EPAM Systems – St. Petersburg, Russia

Development of a web application for effective lecture management at the EPAM Training Center.

##### Valuable achievements:

- Conducted public demos for the customer;
- Adapted the GitFlow branching strategy for the project.

##### Duties include but are not limited to the following tasks:

- Creation of reusable React components in TypeScript;
- Development of new features, for example:
  - displaying events in the application by interacting with the Outlook API and a backend service;
  - calendar scaling using the d3 and d3-zoom libraries;
  - event filtering form on react-final-form;
- Unit-testing (Jest, react-testing-library);
- Bug-fixing. Code Review. Refactoring of existing codebase. Writing documentation.
